

POSSIBILITY OF USING SPECIAL TOOLS splitter cone and cutter bit

EFFICIENCY the planetary gearbox is fully integrated into the hydraulic motor

service life.

HEXAGONAL **OUTPUT SHAFT** hexagon 50mm for

The auger is used to make holes in any type of soil.

a customized project. The use of the highest quality compo-

nents guarantees high performance to the auger and a long

The head integrates directly into the gearbox flange, thus

The head is also made with a **round and compact design**, so

as to be able to enter the hole, if necessary, and save space.

The output pin, with which the tips are connected, is hexa-

making the auger compact and protected.

TR 120/250/450; hexagon 70mm for TR 700/1200/1500

> gonal: 50mm in the TR 120, TR 250 and TR 450 models; 70mm in the TR 700, TR 1200 and TR 1500 models.

DIFFERENT TYPES OF SUPPORT ATTACHMENTS for every need

TOTALLY CLOSED STRUCTURE for protection and greater compactness

INTERCHANGEABILITY

AND DIFFERENT TYPES

OF TIPS ACCORDING TO NEEDS

(Resistance)

The auger can be applied on different machines and the **double joint**, supplied as standard in all models, guarantees the possibility of installing various types of attachment.

The tips are made following strict quality requirements to ensure their **durability** and **high efficiency**: all the tips (except for the smallest: diameter 150mm) are made with a fully welded double helix.

It is possible, depending on the work needs, to choose between different types of tools.

Each model is equipped with a **bidirectional hydraulic motor** with planetary reduction gear integrated into the hydraulic motor itself, designed by GF Gordini and made expressly on
